

TADF Task-Level Architecture Decision Framework

Consultation modes

Window

assets/window.html

Targeted questions with proposed answers; the architect confirms or corrects them by click

Text mode

text-mode.md

The same questions as text, where no window can be shown

Headless mode

headless-mode.md

Decides without questions, for batch and benchmark runs

Procedure

SKILL.md Instructions for the LLM assistant

Picks the mode, proposes answers from the description, checks the result against the rulebook and explains it

Rulebook

Evidence and scoring

evidence-and-scoring.md

Gate evidence, capability scores, calculation rules

Design knowledge

design-knowledge.md

Four categories and build forms, incl. the mandatory minimum

Constructs and scope

constructs-and-scope.md

Definitions of task, paradigms and approval terms; scope

basis for decisions

implementation guidance

definitions

runs one mode
